Elastifizierzusatz
(Elastifying additive)
Art.-Nr. SZ-100-1

To increase the elasticity of 2K-HS top coats and fillers.
Necessary for the varnishing of elastic plastics.

Colour shade	colourless			
Mixing ratio	Addition of 10-20 % to the base material			
Hardener	see notes !!			
Thinner	see notes !!			
Spray viscosity at 20 °C				
Processing	Spray pressure	Spray nozzle	Spray passes	
Air / Flow cup				
Airless / Airmix				
Pot life				
Dry fil thickness				
Flash-off time				
Drying	recoatable	dust dry	tack-free	ready for assembly
	Depending on the amount added, the drying time is extended			

Notes: First add 10-20% of the elastifying additive to the base material. Mix this mixture with hardener and thinner according to the mixing ratio of the base material. Mix this mixture with hardener and thinner according to the mixing ratio of the base material.

Labelling according to Regulation
(EC) Nr. 1272/2008:

flammable

Intended for professional use only.
